

## CLAIMS

1. A crotch-possessing corrective garment constituted including, in an area fitting over a wearer's body, a tightening portion for which the  
5 magnitude of a tightening force varies with direction;

the garment characterized in that when the garment is being worn, the tightening portion runs from above the anal cleft, passing above the left  
10 and right buttocks, to the vicinities of the left and right greater trochanters, and the tightening force in the direction in which the tightening portion runs is made to be lower than the tightening force in the direction orthogonal thereto.  
15

2. A crotch-possessing corrective garment constituted including, in an area fitting over a wearer's body, a left/right pair of tightening portions for which the magnitude of a tightening  
20 force varies with direction;

the garment characterized in that when the garment is being worn, each of the left/right pair of tightening portions runs from the vicinity of the left or right greater trochanter to above the  
25 left or right buttock such as to point to above the anal cleft, and the tightening force in the

direction in which each of the left/right pair of tightening portions runs is made to be lower than the tightening force in the direction orthogonal thereto.

5           3.       The       crotch-possessing       corrective garment according to claim 1 or 2, further having thigh portions that fit over the wearer's thighs, and characterized in that the tightening portions further run from the vicinities of the greater  
10 trochanters along the outsides of the thigh portions.

          4.       The       crotch-possessing       corrective garment according to any of claims 1 through 3, characterized in that when the garment is being  
15 worn, the tightening portions have a shape that is curved above the buttocks.

          5.       The       crotch-possessing       corrective garment according to any of claims 1 through 4, characterized in that when the garment is being  
20 worn, in the lumbar region on the left and the right, the tightening portions are forked upward to the front and the rear, and the rear forks run from the vicinities of the left and right greater trochanters to above the left and right buttocks  
25 such as to point to above the anal cleft, and the front forks run from the greater trochanters

upward.

6. The crotch-possessing corrective garment according to any of claims 1 through 4, characterized in that a left/right pair of supplementary tightening portions are provided so as to run along the tightening portions in front of the tightening portions in the lumbar region on the left and the right, and the tightening force in the direction in which each of the left/right pair of supplementary tightening portions runs is made to be lower than the tightening force in the direction orthogonal thereto.

7. A crotch-possessing corrective garment constituted including, in an area fitting over a wearer's body, tightening portions and supplementary tightening portions for which the magnitude of a tightening force varies with direction;

the garment characterized in that the tightening portions run from the vicinities of the left and right greater trochanters to above the left and right buttocks such as to point to above the anal cleft when the garment is being worn, and the supplementary tightening portions are provided along the tightening portions in front of the tightening portions;

and the tightening force in the direction in which each of the tightening portions and the supplementary tightening portions runs is made to be lower than the tightening force in the direction orthogonal thereto.

8. The crotch-possessing corrective garment according to claim 6 or 7, wherein the supplementary tightening portions are made so as to broaden in a downward direction when the garment is being worn.

9. The crotch-possessing corrective garment according to any of claims 1 through 8, characterized by further having a body front tightening portion that is constituted from a material having a tightening force, and runs upward to the left and right from above the crotch in the front center when the garment is being worn.

10. The crotch-possessing corrective garment according to any of claims 1 through 9, characterized in that the tightening portions are belt-shaped.

11. The crotch-possessing corrective garment according to any of claims 1 through 10, characterized in that the tightening portions are formed through power change in a single piece of warp-knitted fabric.

12. The crotch-possessing corrective garment according to any of claims 1 through 11, characterized by being any of a girdle, spats, sports tights, a leotard, a body suit, or men's pants, tights or spats.

5
